AMENDMENTS TO THE CLAIMS:

Please amend the claims and add new claim 23 as follows:

1.   (Currently Amended) A print service system for providing a print service based on digital image information in an amusement park, comprising:

a print service server connected to a network; and

a digital camera that has a communication function and is connected to the print service server via the network, ~~network;~~

wherein the digital camera transmits digital image information to be printed and order information including receipt information indicating a spot for receiving a print to the print service server via the network, and

wherein the print service server, which is accessible to a database storing ~~databasestoring~~ information about attractions in the amusement park, transmits candidate information of receiving spots including receivable time information and the information about attractions corresponding to the candidate information to the digital camera prior to receiving the receipt information based on existing position information of the digital camera, and also transmits print instruction information including the digital image information received from the digital camera to a printing device provided in a spot that corresponds to the receipt information received from the digital camera.

2.   (Original) The print service system according to claim 1, wherein the digital camera is connected to the print service server via a plurality of radio communication access points that are provided in the amusement park, and the print service server obtains existing position information of the digital camera based on installation positions of the radio communication access points.

3.   (Currently Amended) The print service system according to claim 1, wherein the print

service server transmits the candidate information of receiving spots prior to ~~in earlier order~~

~~of~~ the receivable time.

4.   (Original) The print service system according to claim 1, wherein the digital camera

transmits a desired time for receiving a print to the print service server, and the print service

server transmits the candidate information of receiving spots in order that the receivable time

is closer to the desired time.

5.   (Currently Amended) The print service system according to claim 1, wherein the print

service server transmits the information about attractions within a predetermined area which

~~where~~ includes an existing position of the digital camera and receiving spots indicated by the

candidate information to the digital camera with the candidate information.

6.   (Currently Amended) The print service system according to claim 5, wherein the print

service server transmits a model moving route information including available attractions

from the existing position of the digital camera to the receiving spot indicated by the

candidate information to the digital camera.

7.   (Currently Amended) The print service system according to claim 1, wherein the print

service server, which is accessible to a visiting history database of a user, transmits visiting

history information of an owner of the digital camera for every attraction to the digital

camera.

8.   (Original) The print service system according to claim 1, wherein the print service

server accepts a reservation of the attraction.

9.   (Currently Amended) The print service system according to claim 1, wherein the print

service server transmits the candidate information of the receiving spot and the information

about attractions corresponding to the candidate information to the digital camera with map

information of the amusement park.

10.   (Currently Amended) The print service system according to claim 9, wherein the print

service server transmits the map information of the amusement park, which includes the

receiving spot transmitted from the digital camera and the existing spot of the digital camera,

to the digital camera in response to a request from the digital camera.

11.   (Original) The print service system according to claim 9, wherein the map

information to be transmitted to the digital camera includes imaging spot information of the

amusement park.

12.   (Currently Amended) A print service server for providing a print service based on

digital image information in an amusement park,

        wherein the print service server is accessible to a database storing information about

attractions in the amusement park, and is connected to a digital camera via a network,

        wherein the print service server receives digital image information to be printed and

order information including receipt information indicating a spot for receiving a print via the

network, and transmits print instruction information including the digital image information

received from the digital camera to a printing device provided in a spot that corresponds to

the receipt information received from the digital camera, and transmits candidate information

of receiving spots including receivable time information and the information about attractions

corresponding to the candidate information to the digital camera prior to receiving the receipt

information based on existing position information of the digital camera.

13.   (Currently Amended) The print service server according to claim 12, wherein the

print service server is connected to the digital camera via a plurality of radio communication

access points that are provided in the amusement park, and

        wherein the print service server utilizes installation position information of the radio

communication access points as existing position information of the digital camera.

14.   (Currently Amended) The print service server according to claim 12, wherein the

print service server transmits the candidate information of receiving spots prior to in earlier

order of the receivable time.

15.   (Original) The print service server according to claim 12, wherein the print service

server receives a desired time for receiving a print from the digital camera, and the print

service server transmits the candidate information of receiving spots in order that the

receivable time is closer to the desired time.

16.   (Currently Amended) The print service server according to claim 12, wherein the

print service server transmits the information about attractions within a predetermined area

where which includes an existing position of the digital camera and receiving spots indicated

by the candidate information to the digital camera with the candidate information.

17.   (Currently Amended) The print service server according to claim 16, wherein the

print service server transmits a model moving route information including available

attractions from the existing position of the digital camera to the receiving spot indicated by

the candidate information to the digital camera.

18.   (Currently Amended) The print service server according to claim 12, wherein the

print service server, which is accessible to a visiting history database of a user, transmits

visiting history information of an owner of the digital camera for every attraction to the

digital camera.

19.   (Original) The print service server according to claim 12, wherein the print service

server accepts a reservation of the attraction.

20.   (Currently Amended) The print service server according to claim 12, wherein the

print service server transmits the candidate information of the receiving spot and the

information about attractions corresponding to the candidate information to the digital camera

with map information of the amusement park.

21.   (Currently Amended) The print service server according to claim 20, wherein the

print service server transmits the map information of the amusement park, which includes the

receiving spot transmitted from the digital camera and the existing spot of the digital camera,

to the digital camera in response to a request from the digital camera.

22.   (Original) The print service server according to claim 20, wherein the map

information to be transmitted to the digital camera includes imaging spot information of the

amusement park.

23.   (New) The print service system according to claim 1, wherein the digital camera transmits a desired time for receiving a print to the print service server.
